LITTLE ITEMS OF LOCAL INTEREST

A few of the Carbon chess players journeyed to Calgary to play the Alberta champions, but were not successful in their attempt to lift the championship.

Miss Leita Gordon left on Saturday for a six weeks holiday at the coast.

Alfred Braisher left Wednesday morning for Calgary, where he has secured a position with Bruce Robinson.

S. F. Torrance was a business visitor to Calgary on Tuesday.

Weather permitting, the W.M.S. will hold a silver tea at the home of Mrs. T. J. Ramsay on Friday at 2 p.m.

Sergt. R.H. Purdy, of the A. P. P., who was recently transferred to Bassano, has again been moved, this time to Calgary.

This week the editor received from the Department of the Interior, a map of Northern Alberta, showing the disposition of lands in the Peace River district.

Fred Ohlhauser has purchased a Wallis Tractor from Olive Bros.

The Village has had the Municipal Tractor and grader on the streets, but work had to be abandoned on account of the weather.

The Religious Services ended on Sunday and as a whole the meetings were fairly well attended. The average number at the meetings was about 130, while one evening a record crowd of over 320 was present.

The dance scheduled for Tuesday night was postponed till tonight (Thursday).

C.H. Nash is the owner of a new Studebaker car.

Geo. Tutt has the "Lighting protection" on the door of his car.

Mr. and Mrs. S.F. Torrance and Mr. and Mrs. R. J. Fairbairn were Calgary visitors last week and returned on Thursday.

W. A. Braisher returned on Friday after attending the Masonic convention in Calgary. Mr. Braisher was among the number who had the misfortune to fall into the base-

ment when the platform gave way during the ceremony, but he managed to escape with a few minor bruises.

Mr. and Mrs. L. Poxon were Calgary visitors last week.

The Board of Trade luncheon, which was held in the dining room of the Carbon Hotel last Wednesday at 1 p.m., was not as well attended as it should have been, but those present were well pleased with the speaker, Rev. Geo. Dickson, who gave an address on "Canada and Canadians, from the view point of a Scotchman."

The Continental Players, a travelling vaudeville company, arrived in Carbon last Friday and camped in the park. On Monday evening the players put on a performance in the Farmers Exchange hall, although the crowd was not as large as was expected. The players left on Tuesday for Swallow.

—There will be a dance in the Gamble school on Friday evening, June 29th.

This is the month of June. The poet's month and the month of weddings. Let us print your wedding stationery. Prices reasonable and satisfaction guaranteed.—The Chronicle, Carbon.

—C. H. Bothamley, jeweler, will be at Peters Store every Thursday with an up-to-date stock of Diamonds, Watches, Jewelry, etc. First class repair work done while here. Leave repairs at Peters store. —

READ THE ADVERTISEMENTS

WEDDING BELLS

FULLER—DOUGLAS

A very pretty wedding was solemnized on Wednesday last at high noon, at the home of Wm. Douglas, north of the Horse Shoe Canyon, when M. Alfred Fuller of Carbon, and Annetta C. Douglas were married. The officiating minister was Rev. Percy Halstead, B.A., B.D., Rosebud.

The ceremony was to have been on the lawn of the Homestead, but the weather being inclement, the home was arranged as a veritable Lovers' Bower, with a profusion of flowers and suitable decorations.

The bridegroom was supported by his nephew, Earl Fuller, while the bridesmaid was Elsie, sister of the bride. To the strains of "Lohengrin" played by Miss Peggy Adam, Drumbeller, the bride entered on the arm of her father. While the register was being signed Miss Adam entertained with some classical music. Among other selections she played, on the violin, was "O Promise Me." She was accompanied on the piano by the Rev. P. Halstead. A sumptuous repast was enjoyed, and the usual toasts were responded to in time honored fashion.

The bride looked charming in a chic dress of white georgette with veil and orange blossoms, and carried a lovely bouquet of roses. Her going away dress was tan with touches of Paisley, with coat and hat to match.—Drumbeller Mail.

LETTERS TO THE EDITOR

Carbon, Alberta, June 18th.
Editor, The Chronicle.

Dear Sir:

Your valuable paper seems
(concluded on inside page)

THE POWER OF THE POOL

Lies In Volume Control

The Canadian Wheat Pool Now Handles ONE FOURTH of the World's Exportable Wheat Surplus.

The Wheat Pool has given ample evidence of its usefulness to wheat growers since last harvest. Faced with the handling of a damaged crop and with a large increase in world production, the Pool has been successful to a considerable degree in preventing disastrous slumps. Every wheat farmer in Western Canada owes a debt of gratitude to the Wheat Pool.

The power of the Pool lies in the control of volume. Every bushel placed in the Pool means greater strength. The organization needs your assistance.

The ideal of co-operation is working together for the common good. It is opposed to any system that makes a profit on the result of the labors of the producer. Its operations mean more wealth for all the producers.

Co-operation is not merely a sentiment, but an economic necessity. Let the hearts and minds of our farmers become enthused with its ideals and there is hope for the economic future of agriculture.

You who have not signed a Second Series Wheat Pool Contract gain nothing by delay. You only endanger the welfare of an organization that has proven the best friend the farmer has ever had.

"Safety First" on the Highways

The phenomenal growth in the number of motor driven vehicles on the highways of this continent constitutes one of the most amazing developments of modern times. The motor car has, in fact, completely revolutionized modes of living in the space of a very few years, and, equally so, has ushered in an entirely new era in the history of transportation.

It is not necessary to even enumerate the many changes which the general use of the motor car has brought about. These changes are patent to everyone. The result has been, of course, to likewise create entirely new problems which did not confront, and were never dreamed of, by the people of a couple of generations ago.

The motor car has forced governments and municipalities to completely re-organize plans and the work of road building because what was regarded as an excellent road for horse drawn buggies and wagons is quite obsolete in these days of motor traffic. The result has been to compel huge expenditures upon all governmental authorities, not only in the construction of a much higher standard of road, but in annual maintenance charges in order that such roads shall be kept up to that high standard, and shall be available for use at all times in all weathers.

In large cities, the multiplicity of cars has created congestion and traffic problems of the most difficult kind, and the number, power and speed of modern cars not only an hourly danger to each other and their occupants but to all pedestrians. Laws governing rates of speed, laws prohibitive of glaring headlights for night driving, and innumerable rules of the road in an effort to regulate this enormous and ever increasing traffic, have been passed. Many of these enactments were experimental and found ineffective. Amendments to laws have followed amendments in rapid succession, yet the toll of accidents and violent death mounts steadily higher and higher.

The fact might as well be faced,—it must be faced,—that only through the practice of the principle of "Safety First" by the people themselves,—all the people,—can the civilization of today really control this modern juggernaut which the inventive genius of this generation has brought into being and to such a high state of power and efficiency.

Legislative enactments, and arrests and fines for violation of those laws, will not, and can not meet the existing problems. Public sentiment and the public conscience must be aroused against those who habitually and wilfully disregard the laws and regulations passed in the interests of all people. The speed maniac, the man who persists in flashing blinding headlights in the eyes of all other car drivers, the crank who considers it an insult and a reflection upon himself and his car to allow any other car to pass him on the road, the crazy fool who not only disregards all safety precautions for himself but who is callously indifferent to the fate of others, and the common "roadhog" who ignores everybody's rights and selfishly arrogates whatever he desires to himself,—all these enemies to the welfare, enjoyment, rights, and even lives of others, must become taboo throughout the land and be ostracised by his fellow citizens in the community.

Every driver of a car should keep constantly in mind that it is a powerful machine he has in his control, and that the safe way is the sane way. Common sense will prevent accidents. Apply it. There is not only the law but an etiquette of the road. Observe it. Protect person and property—your own and the other fellow's.

Two controllable factors enter into accident prevention on the streets and highways,—your car; yourself. Always observe, among others, the following simple rules for safety:

1. Keep your car right; see that the brakes, steering gear and headlights are in perfect working order.
2. Keep your eye on the road and your hands on the wheel.
3. In passing traffic, look ahead.
4. If a "road-hog" tries to pass you—let him.
5. Entering main streets and highways—stop and listen.
6. Don't rush through nor "loaf" in heavy traffic.
7. Signal before you slow down, stop, or change your course.
8. Look before you back up.
9. Obey the "Stop" signal.
10. Watch your "Step"—Don't "step" on the gas, the train will win.

Pretty Cashier: "I think I need a holiday for the sake of my health. My beauty is beginning to fade."

Manager: "What has put that idea into your head?"

Pretty Cashier: "The men are beginning to count their change."

"Hi, there," bellowed a policeman to an inebriated citizen, "you can't stand there in the street."

"Yes, I can orfsher" retorted the citizen proudly. "Don't you worry 'bout me. I been standin' here an hour an' ain't fell off yet."

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

SEA STRAIGHTENS ROMANTIC TANGLES

When May Christie, whose novels and articles are read all over the North American Continent, reaches an impasse with characters in her novels, she "sends them on an Atlantic voyage," to use her own words, because their tangles are unravelled on the ocean. Miss Christie, now married to J. S. Mazzavini, New York broker, is shown here on the White Star liner Megantic, leaving for England after spending ten months on the North American Continent, in which time she wrote two 76,000 word novels and forty-five articles.

Improving Our Highways

The total amount spent on the improvement and maintenance of Canadian roads during 1926 was approximately \$45,500,000.

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Is Enriched

The most urgent need of all who suffer from any form of indigestion is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food it takes. New strength is given to weak stomachs by Dr. Williams' Pink Pills because they purify and enrich the blood. This accounts for the speedy relief in stomach disorders that follows the use of this medicine. The value of this medicine in cases of indigestion is shown by the case of Mrs. George W. Johnson, Lequille, N.S., who says:—"I have no hesitation in recommending Dr. Williams' Pink Pills. I was greatly distressed with indigestion. Always after eating I suffered from pains in the stomach and other distressing symptoms. I tried different remedies, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills, which I readily did, and I am feeling very grateful ever since to the person who gave me the advice. The very first box helped me and before I had taken a half dozen boxes I was restored to my former good health and all traces of this distressing trouble disappeared. It is now about a year since I took the pills, and I have not been troubled with indigestion since. I have taken every occasion to recommend Dr. Williams' Pink Pills to those in need of a medicine and shall continue to do so."

A little booklet, "What To Eat and How To Eat," will be sent free to anyone asking for it. You can get the pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Ship Muskrat To Europe

What is believed to be a record for muskrat shipments from Canada has left on board the Canadian Pacific vessel "Beaverdale," bound for Antwerp. It consists of 149 muskrats, the foundation stock for muskrat ranches in Germany, Finland and France. The consignment was made up of 74 pairs and operated at a muskrat farm at Lindsay, Ontario.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

A going clock is one that has been wound up, a going concern is one that hasn't been.

The gross area of the United States is 3,026,789 miles.

Recipes For This Week

(By Betty Barclay)

ECONOMICAL PUDDING

- 1 quart water.
 - 1 teaspoon salt.
 - 1 cup pearl tapioca.
 - 1 teaspoon vanilla.
 - 4 tablespoons butter.
 - 1 1/4 cups brown sugar.
- Cook tapioca in water until transparent. Add other ingredients. Bake one-half hour.

LEMON DROP COOKIES

- 1-3 cup butter.
 - 1/2 cup sugar.
 - 1 egg.
 - 1/4 teaspoon soda.
 - 2 tablespoons hot water.
 - 1/2 tablespoon lemon juice.
 - Grated rind 1 lemon.
 - 3/4 cup flour.
- Cream butter; add sugar, gradually, and egg, beaten until thick and light, soda, dissolved in hot water, lemon juice, grated lemon rind, and flour. Mix well, drop from tip of teaspoon onto buttered baking sheet, and bake in a quick oven.

To make crisp cookies, use one and one-half cups flour when mixing; chill thoroughly, roll very thin, sprinkle lightly with sugar, cut out, and bake.

Much of the experience a man gets comes too late to benefit him.

Continues Best Seller

Over Ten Million Copies Of Bible Sold Last Year

The Bible continued to be the world's best selling book in 1927, establishing a new record of 10,031,797 copies, says the annual report of the American Bible Society.

Copies were published last year in 166 different languages and dialects, and the first complete Bible in the Luba Lulua language of the 2,500,000 Bantu natives of the Belgian Congo was issued by the Society.

There are 150 convicts serving life terms in prisons of Canada.

Druggist Gave Her Very Good Advice

Miss Ruth Horowitz, Bronx, N.Y., writes: "Having been troubled with indigestion caused by constipation for several months, my druggist advised a purely vegetable laxative pill."

"I can safely say that since I am taking them, and only one each night, I feel like myself again and can eat most anything without fear of an attack."

**COMBINED 1110 ACRES
Same Cost as 110 Acres
Handled by Old Method**

We threshed enough to know what the stooked grain would yield and could estimate approximately what it would cost us by this method and found that the one hundred and twenty acres handled by the old method would cost us a little more than the eleven hundred and ten acres combined with our "Holt" Combined Harvester.

Our experience in this, the worst year Alberta has known probably, for combining grain, has proved to our entire satisfaction that the swather and pick up way of handling grain in this section is going to be the most wonderful blessing that has ever come to Southern Alberta, and what is good here may be just as good wherever windy summers cause the straight combining to be of doubtful advisability.

We have doubted if we could get as good grades as by the old method, but the man who managed the elevator tells us that our grain had graded higher than the average stationary threshing in this vicinity.

ED. J. ROULEAU,
Editor and Publisher

LETTERS TO THE EDITOR

(continued from front page)

to be the medium through which the following can be prominently brought to the attention of the public and the directors of the affairs of the Village.

In the words of the poet, "Water water everywhere, and not a drop to drink." We try one well after another. Some produce a mixture of mice hair; some water is nauseating to the smell and taste. Is it not about time that we should have a Village pump or deep well, where we can all take a good drink and pride in possession?

The little children's health should not suffer through lack of nature's purity and the expenditure judiciously of a few dollars to drill a well in the centre of the Village for everyone.

JACK CURGENVEN

Swalwell, Alta.

Editor, The Chronicle,
Carbon, Alberta.

Dear Sir:

Kindly publish the following in your paper, noting that there has been an epidemic of Dog Poisoning in Swalwell, and many valuable dogs and poor children's pets have invariably been killed under this regime. Also note that these lines have been dedicated to the Dogs' honor by Ramsey Nash.

Yours truly,

PUBLIC OPINION

Any man who would deliberately poison a dog has it on all other skunks. He is the lowest degenerate of the lot. It is dollars to doughnut holes that if a post mortem were held on him, enough red blood would not be found in his veins to soak the brains of a gnat. He is usually a chronic dyspeptic who objects to the prattle of children, despises all his neighbours and hates himself. He never longed for a pal during childhood, nor enjoyed the companionship of his fellow humans after life. He is a selfish unadulterated grouch who never looks his fellow men in the face; is usually a worshipper of gold and a "gink" who would fill his belly with luke warm slough water, to delude himself into the belief that he had been to a banquet and so save himself the price of a sandwich. He would go crummy rather than spend a dime for a fine tooth comb. His heart is a green worm that feeds on gall and his order of sanctity would give a pole cat convulsions. If his milk of human kindness were churned the product would be limberger cheese. A thousand years of prayer and intercessions could not make angelic pin-feathers sprout on the shoulders of this buzzard. Better to be a magot in the carcass of a mangey snake than to associate with such as he, a human excuse. He should be isolated on some desert island where his only companions would be snakes, lizards, fleas and lice, there to remain until his inhuman pernicious cowardly soul had been howled to oblivion by the ghost of the lives that he had destroyed.

WORLD HAPPENINGS BRIEFLY TOLD

Partial prohibition has been decreed in Tabasco, Mexico, by the State Government. An order was issued making it unlawful to sell any alcoholic drink except beer and cider.

There will be no Canadian endents sent to the Junior Bisle rifle meet this year, it has been announced. Word has been received that a team would have to pay its own expenses.

Three delegates from Soviet Russia will attend the International Wheat Pool conference to be held in Regina on June 5 to 7 inclusive, according to word received by C. P. Burnell, chairman of the International Conference Committee.

Gerald T. Evans, of Vancouver, B.C., won the Sutherland gold medal in biochemistry, it was announced at McGill University, when the second year results in the Faculty of Medicine were posted.

A matter of fact statement in the official Turkish newspaper Milliet says that the Ankara Government has passed a law forbidding the importation and use of calculating machines in Turkey under severe penalties.

The application of the Winnipeg Board of Trade for a revision of the regulations applying to attendants travelling with race horses has been rejected by the Board of Railway Commissioners. The application was to permit more than two attendants to travel free in cars with race horses.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Build Eighteen Elevators
Eighteen elevators are being constructed by the Alberta Wheat Pool. Each will have a capacity of 20,000 to 40,000 bushels.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Ozer, Elginburg, Ont., writes: "I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would have real bad spells. I suffered in this way for some time when, one day, I saw

advertised, so decided to try them. I had only taken a few boxes when I noticed that I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

Continued.

The Co-operative Wholesale Society embraces almost every conceivable form of modern industry and commerce. It manufactures everything that the modern household needs. It owns a fleet of ships, a printing establishment, wharves, warehouses, fishing stations, tea plantations in Ceylon and farms in the British Isles. It operates a bank, which has an annual turnover of several million dollars. Its Sun Flour Mill is the largest in Europe and works day and night. Here great quantities of Canadian wheat are regularly used. This was our next point of inspection. We were all equipped with long white coats and spent two hours seeing this tremendous mill.

Following our visit to the C.W.S., we were the guests of the Chamber of Commerce at a meeting arranged by representatives of the Fruit and Provisions Trades, who addressed us on the requirements of the Manchester market. We were thus again enabled to gather much useful information.

We now hurried back to our hotel and to get ready for one of the outstanding functions it was our privilege to enjoy during our trip—the reception by the Lord Mayor and Lady Mayoress of Manchester. Over 1,200 citizens of Manchester assembled in the Guildhall to meet us and the spectacle as all these people stood in the main body of the brilliantly lighted hall, while we were welcomed by the Lord Mayor, is one that will never be forgotten by those who attended.

On the morning of the 20th we were taken through Trafford Park, one of the greatest and most modern industrial sights of England. Here there were vast storage and handling facilities for products from every quarter of the globe that find their way to Manchester. Some Canadian products were on view, but competing products from Ireland, Denmark and other countries were much more in evidence. We saw the great safes where cotton is stored and after which the latest cotton storage safes of New Orleans have been modelled.

We were here privileged also to see one of the greatest industrial plants of England—the Metropolitan-Vickers Electrical Works—the magnitude of which could not be comprehended by one who has not seen it. Here is made everything electrical from the equipment of super-power stations to the smallest domestic appliances. In the main shops each of the great aisles is 400 feet long by 90 feet wide, the over-all width of each shop being 440 feet, and 80 feet from the floor to the ridge of the roof. Each of the two main aisles is spanned by three or four fifty-ton electric cranes, which can pick anything up from any part of the floor.

We were next taken for a trip down the great Manchester Canal, by which ocean-going steamers reach the very doors of the city, 35 miles inland. Accompanied by the Chairman of the Board and many other officials we were enabled to view the great shipping of the port and pass through lock after lock toward the sea. During this trip we saw a swing bridge over the Canal open to let our steamer pass and when it closed we saw, to our astonishment, that the swing bridge itself was part of a small canal on a higher level and a few seconds afterwards a number of barges passed over it.

The Manchester Ship Canal might be said to be one of the wonders of the world. Though a private company, it is owned by 40,000 shareholders, many of them laboring men. The rise of Manchester to its present position as a port, is almost entirely due to the completing of the Ship Canal. The long hard parliamentary fight for its construction developed in Manchester a co-operative spirit and civic pride which would be hard to duplicate in even a modern Western Canadian town.

After viewing the Ship Canal we were the guests of the company to a magnificent lunch in the Midland

Hotel, to which were gathered the leading business men of Manchester.

Following this we paid a short visit to the Royal Exchange, the largest Exchange in the world, with a ground-floor space of one and three-quarter acres. Unlike trading exchanges in our country, seats are not owned, but members join on an annual fee basis. The Royal Exchange of Manchester represents chiefly the cotton industry and those allied to it. "High change" is on Fridays, when as many as 7,000 men may sometimes be seen gathered together buying and selling on the floor of this Exchange.

Our journey from Manchester to Wolverhampton provided a mild adventure, for by the time the coaches had reached Knutsford, a little town made famous by Mrs. Gaskell, in her story "Cranford," a fog blanket had fallen. We "hove to," wondering if we would be able to continue the remaining 60 miles, or if this fog would mean a night in the coaches by the side of the road, with every chance of being rammed from behind by other motorists. After an hour's wait, however, the fog lifted somewhat, and it was decided to push on as long as our drivers could see a yard ahead of them. The headlights were turned to the side of the road and with one man standing on the running board we made progress at about five miles an hour. During this long and tedious journey we sang songs and told stories while away the time after all quite pleasantly.

We reached Wolverhampton at 11.30 where, notwithstanding the late hour we found the Mayor (Councillor A. E. Wood), waiting for us and a steaming supper which was certainly welcome. In the circumstances, the Mayor cut out all formality, inviting us to join him after supper in the lounge where we were entertained. Here also we met Mr. E. W. Brown, of the London Office of the Canadian National Railways, who, besides his business qualifications, has a first class reputation as a Canadian singer, and kindly gave us of his best. We left Wolverhampton immediately after breakfast for the ham and bacon factory of Messrs. March & Baxter, at Brierly Hill, a small town a short distance out of Birmingham. This plant is one of the finest of its kind in the country and Messrs. March & Baxter are the largest bacon curing firm in Great Britain. The Company believe that to maintain quality in their products, the very finest raw material must be used and to this end conduct educational campaigns amongst the farmers who supply them.

(To Be Continued.)

Praise For Canada

Mrs. Stanley Baldwin Cannot Imagine Anything Nearer Paradise

"If England ever gets tired of us, the prime minister and I will probably go to live in Canada, that is if we are not too old, for we were so delighted with the Dominion on our recent visit."

This was the declaration of Mrs. Baldwin, wife of Great Britain's premier, Stanley Baldwin, when addressing the girls at a distribution of prizes at the City of London school.

Mrs. Baldwin urged the girls to go to Canada for, she said, "there is no better place for young married people; and providing girls choose the right kind of men, I cannot imagine anything nearer paradise."

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

New Assistant: What is in that red bottle?

Old Hand: That's the medicine we give customers when their prescriptions are illegible.

Minard's Liniment for insect bites.

An English paper suggests that it is not so hard to escape from a flapper, "but a widow knows all the details."

SUNDAY SCHOOL LESSON

JUNE 10

THE ARREST AND TRIAL

Golden Text: "He was despised and rejected of men."—Isaiah 53.3.

Lesson: Mark 14.43 to 15.15.

Devotional Reading: Isaiah 53.1-6.

Explanations and Comments

Pilate Questions Jesus, verses 1-5. —It was about six o'clock in the morning when the chief priests and the elders and scribes, the whole council or Sanhedrin, after holding a meeting, declaring Jesus worthy of death and binding Him, hurried Him to the Praetorium where Pilate held his court. Pilate was obliged to come out to them, for the priests would not pollute themselves by entering a Gentile court just before the Passover (John 18. 28, 29). They demanded that Pilate confirm their sentence of death pronounced upon Jesus. Pilate demanded to know what charge they brought against Him. Three accusations they put forward; Pilate was concerned about one of them only, "Art Thou the King of the Jews?" Pilate questioned the Sanhedrin made this accusation against Him because they needed a political charge, one hostile to Roman supremacy, in order to influence Pilate. Perhaps there was something of contempt and something of pity in Pilate's voice as he looked at the wearied Prisoner and thought Him a pathetic picture of royalty. Pilate had the right to know the truth, and Jesus answered "Yes," as the literal translation of the Greek for "Thou sayest" means. (The Expositor's Greek Testament thinks one is hardly prepared for such a reply to an equivocal question, and says there is a temptation to seek escape by taking the words interrogatively: Dost Thou say so?—or evasively—You say so, I make no statement.)

When the chief priests accused Jesus of many other things, he was silent. "Answerest Thou nothing?" said Pilate; "Behold how many things they accuse Thee of." Still Jesus stood in regal silence, and Pilate marvelled. Jesus knew that no words would influence that mob in their frame of mind. "I read very little in the life of Jesus respecting His rights," F. W. Robertson writes, "but I hear a vast deal respecting His wrongs wrongs born with a majestic, God-like silence."

"I have had to learn to keep absolutely quiet under every accusation."—Lincoln.

Recipes For This Week

(By Betty Barclay)

LIGHT LUNCH CROQUETTES

Two cups left-over meat or fish may be mixed with 1 cup thick cream sauce for croquettes. Mold in desired shape, roll in dried bread crumbs, then in beaten egg, again in bread crumbs and fry in hot fat. Thick cream sauce calls for 1 cup milk, 1-5 cup flour, 3 tablespoons butter, 1/2 teaspoon salt and a touch of pepper.

RHUBARB PUNCH

1 quart rhubarb.
1 quart water.
1-3 cup orange juice.
4 tablespoons lemon juice.
1 1/2 cups sugar syrup.
Few grains salt.
1 pint mineral water.
Cut rhubarb in small pieces, cook with water until fruit is soft. Strain through double thickness of cheese-cloth, add orange juice, lemon juice, sugar syrup and salt. When ready to serve pour over a cake of ice in a punch bowl, add mineral water and allow to get very cold. Makes 8 glasses; 24 punch glasses.

There are times when the almighty dollar will not go as far as a little politeness.

ECZEMA IN RASH ON HANDS
Troubled For Three Years.
Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much worse in winter so I could hardly put my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves to keep from scratching."

"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used them for three months I was healed."

(Signed) Miss Beatrice Aiken, Highwater, Que.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample Each Free by Mail. Address Canadian Dept., "Cuticura," Ltd., Montreal. Price, Soap 50c. Ointment 25c. and Talcum 25c.

A Strange Luncheon Party

Twenty Guests Entertained Inside Great Organ At Royal Albert Hall

A luncheon party of twenty men inside an organ would seem impossible, yet this happened lately in the swell-box of the great organ at the Royal Albert Hall, London, beneath its 13,000 pipes and amid a storm of music.

The guests had come to be shown some of the intricacies of this wonderful instrument, which is soon to have added to it a solo organ with several thousand new pipes. It will then be the largest concert organ in the world.

At this strange luncheon party one of the hosts was Dr. Eaglefield Hull, the organist, who is shortly giving a series of recitals to test every resource of the huge organ.

The Oil For the Athletic.—In rubbing down, the athlete will find Dr. Thomas' Eclectic Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years, have been using it can testify to its value as a lubricant.

With nearly 2,500 convicts serving terms in Canadian prisons, less than 150 are Negroid, Indian or Mongolian.

How Much Water Should Baby Get?
A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

SHIP CHRISTIE'S BISCUITS BY AIR FREIGHT

When Major Fitzmaurice, the Irish member of the "Bremen" crew arrived at Seven Islands from Greenley Island, he and "Duke" Schiller, pilot of the relief plane, were met by Mr. L. A. Genest, Lower Quebec representative of Christie, Brown & Co., Limited; and Mr. Stewart of the Clarke Trading Company, who tendered them refreshments in the shape of hot coffee and Christie's Biscuits which were, naturally, much appreciated. The above picture shows the aeroplane which carried the first shipment of Christie's Biscuits by Canadian air freight from Toronto to Windsor.

C. P. R. Adds Further Trackage

Photos show the huge area covered by the railway tracks of the Canadian Pacific Railway around the harbour of Vancouver, also the new elevators recently constructed.

Over one hundred miles of trackage will shortly have been laid by the Canadian Pacific Railway in serving the ports of the Vancouver district, is shown by the extent of the works now underway about that city.

An indication of the programme of extension of the already multi-fold trackage facilities is given in the plans being carried out at Pier B-C at the foot of Granville Street, and in the proposed new C.P.R. yard at the south end of the second Narrows Bridge, and of the allowance for further additions when necessary.

Mr. C. A. Cotterell, C.P.R. General Superintendent, has issued a press demonstrating the vast ex-

tent of existing trackage facilities exclusive of main and subsidiary lines running through the yards for the passage of through and local trains, serving Vancouver and her sister ports.

On the north shore to the south end of the second Narrows Bridge, the C.P.R. has more than 9 miles of trackage. From the south end of the second Narrows Bridge to Coal Harbour are another 27 miles. The False Creek Yard comprises 27 miles, and the south False Creek Yard has between three and four miles. In the Coquitlam Terminal Yards, serving both Vancouver and New Westminster, there are 22 miles of trackage, with yard capacity for double that mileage should it become necessary. Another four

miles of yard rails lie west of the Fraser River Bridge.

This trackage, so far as the C.P.R. is concerned, is not only taking care of a steady and normal growth in trade through the great port, but also handling an abnormal expansion in westward grain movement. Additions have been made and others will be necessary to care for this growing westbound traffic which reached a peak in the crop season of 1927-28. The Canadian Pacific's first westward wheat shipments were made in 1922, attained more than 50,000,000 bushels in 1923-24, and reached the record this spring of 53,000,000 bushels shipped through the port before the end of February.

We sell the World's Greatest Tire

AFTER its introduction a little over a year ago, today's Goodyear All-Weather Tread Balloon was quickly recognized as the World's Greatest Tire. Greatest because of its wonderful All-Weather Tread, specially designed for balloon tires. Greatest because it is built with SUPERTWIST Cords. Study the chart which shows why SUPERTWIST Cords are less easily injured by road shocks and last longer.

Garrett's Garage

Phone 31 -- Carbon

Buying at home means service at home

Work on the Royal York, new hotel of the Canadian Pacific Railway in Toronto, is ten days ahead of schedule and there is now every probability that it will be completed by May 1, next year. It will tower 395 feet above the sidewalk, being the tallest building in the British Empire.

A. Allerton has been appointed general manager of hotels and bungalow camps east of Fort William, operated by the Canadian Pacific Railway; and H. F. Mathews, general manager of hotels and bungalow camps from Fort William to the Pacific. The appointments were consequent on the death of C. E. E. Usher, late general passenger traffic manager of the railway.

Palle Huld, 15-year-old Danish boy, who is travelling round the world in 46 days, passed through Montreal and the east of Canada recently on his way to Vancouver, whence he will sail by Canadian Pacific All-Red route to Yokohama. The exploit is in commemoration of the hundredth anniversary of the birth of Jules Verne, whose book "Round the World in 80 Days" has always been a favorite with boys.

Fort William.—Elevator capacity at Fort William will probably total 100,000,000 bushels by 1930. Present storage capacity of the twin cities is recorded as 72,540,000 bushels and between 9,000,000 and 10,000,000 bushels will be added before the 1928 crop is garnered. Expansion in the following two years will take about 20,000,000 bushels, one of the largest terminal building projects either in the history of the lake-head ports or any of the other centres of the continent.

Because It Is Farmer Owned

Because it is farmer owned, farmers expect, and they have a right to expect, the highest possible standard of service and treatment at elevators of this farmers' company.

And many farmers tell us that they do get such service and treatment at U.G.G. Elevators.

WORLD HAPPENINGS BRIEFLY TOLD

Miss Eleanor Lodge, a sister of Sir Oliver Lodge, noted scientist, is the first woman to receive the degree of doctor of literature from the Oxford University. She is 59 years of age and a well known historian.

An air mail service between Montreal and Albany, N.Y., will probably be established in the near future, according to an announcement made in the House of Commons by Hon. P. J. Venoit, Postmaster-General. He thought that the contract would be let within a short time.

Captain Darbos, who flew the first French airplane on the war front which was equipped with a machine gun and to whose experiments the adoption of machine guns in war aviation was in a large measure due, was killed in a crash near Oran in Africa.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Each automobile worker produces more than three times as much now as he did before the war.

For Rheumatism use Minard's Liniment.

A promise is but a small outlay from which large returns are expected.

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont. "I began taking Vegetable Compound for nerves and other troubles and I must say I felt different after the first dose. I have been told this last six months that I look twenty-five, although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young." Mrs. McKee, 18 Laurier Ave., Toronto, Ontario.

W. N. U. 1738

STUDEBAKER PLANT AT WALKERVILLE, ONT.

The Walkerville Plant of the Studebaker Corporation of Canada, Ltd., where the Studebaker and Erskine Cars are manufactured, is now a purely Canadian concern, employing Canadian labor, and using Canadian material. Studebaker and Erskine cars are becoming increasingly popular throughout the Dominion.

Studebaker To Build Canadian Automobiles For Canadians

Friendly Divorcement Of Canadian Organization From Studebaker Corporation Of America

With the announcement of a far-reaching reorganization of both administrative and manufacturing policies, the Studebaker Corporation of Canada, Ltd., has assumed a front rank position among the Dominion's largest independent manufacturers. The announcement, which indicates a friendly divorce of the Canadian Studebaker Organization from the Studebaker Corporation of America, was issued by A. R. Erskine, president of both industries.

The new Studebaker organization will be directed by D. R. Grossman, formerly sales manager for Studebaker in the Dominion. Mr. Grossman's title will be vice-president and general manager. Having been associated with Studebaker in Canada for the past six years, Mr. Grossman is well known to the Dominion's automotive leaders.

"The motive behind the reorganization is to be found in our desire to build Canadian Automobiles for Canadians," says the statement. "The Studebaker Corporation of Canada, Ltd., is Canadian. We will use more and more of Canada's great supplies of raw materials. Not only will our consumption of these commodities be increased, but new commodities will be added to our purchasing agent's order lists.

"We want to build automobiles for Canada and we want Canadians to approve of them. It is felt that the time has come to go ahead and no time will be lost in increasing the number of cars actually built in Canada. We hope to secure greater efficiency than has been possible in the past, which will result in greater automobile values for Canadian purchasers.

"Continuing the precedent already established, the personnel of the Canadian organization will be almost exclusively Canadian. In addition,

New Studebaker Organization

D. R. Grossman, vice-president and general manager.

present plans contemplate that advertising and printed matter shall be prepared in Canada, and, in short, a large percentage of every dollar spent in connection with the Canadian business shall be paid to Canadian individuals and Canadian firms.

"The new arrangement will mean a gradual increase in the number of employees at the Walkerville plant. Branches are now maintained at Montreal and Calgary. These will also be greatly increased.

"This move is a result of Studebaker's faith in Canada," said Mr. Grossman recently. "We believe there will be wonderful developments in this country and through this expansion program, we will naturally become a part of those developments."

proper solutions, and holds it up to the light to see if his picture is there. What else did this Great Teacher do on that day but hold up those souls to the light to find out if the reflection of the Son of God were fastened there?—J. M. Stiller.

Improved Guide For Airmen

New Radio Beacon Will Chart Course For Trans-Ocean Flyers

Trans-ocean fliers of the future, will be able to fly a course definitely charted by means of an improved type of radio beacon which has an absolutely fixed wave length, it has been announced at the Radio Aircraft laboratory at Dayton, Ohio.

Captain Paul S. Edwards, Signal Corps, U.S. Army, in charge of the laboratory said:

"The signal corps here have made improvements in beacons which increase its efficiency 100 per cent. over the old type.

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Friendship and confidence are plants of slow growth.

Athletes.

For sprained ligaments, bound muscles, kicks and bruises — use Minard's.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

It was just a step to Canada House and a reception by the Hon. Peter Larkin, High Commissioner for Canada. We were all impressed by the appearance of Canada's headquarters in Great Britain. Overlooking Trafalgar Square, Canada House occupies one of the most commanding sites in London, and does honor to our Dominion. There was no formality, no speeches, just a friendly handshake and a few words for all in the private room of the high commissioner.

Now came the event of the day, the reception at St. James'. It was not without awe that we entered this simple stately palace of red brick after passing its castellated gateway guarded by sentries wearing the famous busby. This palace which we Canadian farmers were entering had been the home of Charles the First, and is today the scene of Levees and Privy Councils. We mounted the beautiful stairway to the Entrance Room. A short wait and the Prince was in the Audience Chamber ready to meet us. The door opened. There was His Royal Highness, not seated but standing at the entrance with a smile of welcome. We were introduced by Mr. Groff who performed a feat of memory by remembering all our names.

The Prince had a handshake, a smile and a few words of greeting for every member of the party, but his friends and neighbors from Alberta were specially honored. Mr. William Sharpe, who once played the pipes at a party on the Prince's ranch, was at once recognized by His Royal Highness, who asked Mr. Sharpe if he had brought his kilt. The Prince asked Mr. C. H. Marshall how their mutual friend T. U. Brown was getting on, and Mr. P. J. Tooley, of the Peace River, was questioned about Peace River problems and the probability of railway connection with the Pacific Coast. The interest of the Prince in Canada was spontaneous and real, and we were delighted with his evident regard for our great Dominion.

After the reception we were shown through the Armoury, Queen Anne's Drawing Room, the Tapestry Room, the Throne Room, and the Picture Gallery, with its Royal portraits dominated by the paintings of King Henry the Eighth at one end of the room, and Queen Victoria at the other.

Our next appointment was at Harrod's great stores where we were entertained by Sir Woodman Burbidge head of this great firm, to lunch, afterwards visiting the Provision Shop and some of the factories of this great establishment. Harrod's is perhaps the finest department store in London and its provision shop is a model for such establishments. Canadian products have a prominent place in it.

Our official day concluded with a visit to the London Headquarters of the Danish Bacon and Co-operative Trading Company through which passes a large part of the Danish bacon supplied to the British market. In a single fortnight as many as 400,000 sides have been received and distributed from this one plant. Besides acting as a distributing centre the company operates thirty smoke-houses. It was interesting to learn that a thick pitch-like substance which encrusts the walls, the result of many years' deposit, imparts to the bacon much of its aroma and flavor. The deposit is caused by the volatile oils which bacon sides exude while curing.

Non-resinous wood is used in the smoking process. Shrinkage during the curing process is approximately 7 per cent.

Every bacon side bears several stamps which permits the Danish Bacon Co. to trace the origin and date of killing of every piece of meat that reaches its establishment and obviates any possibility of bacon being distributed which may have been held up over long at the producing point, or shipped too soon to take advantage of satisfactory conditions. The sides are graded by experienced men who, through long association with the British market, know accurately the requirements of each of the customers of the Trading Company.

The British custom of serving 4-o'clock tea in business offices is fast "taking on" in Canada. Many Canadian, as well as British-born, executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English teas. Sold by all grocers, in bright, clean aluminum.

INVENTORS

Fortunes are made from simple inventions wanted by manufacturers to supply the ever increasing demands. "Inventions Wanted," our booklet "Patent Protection," and magazine "The Thinker" sent on Request.
HAROLD C. SHUPMAN & CO.
INTERNATIONAL PATENT SOLICITORS
Ottawa, Canada
74 Metcalfe St.

The Danish Bacon Co-operative Trading Company is an example of a combined producer-consumer co-operative organization. Half of the capital stock is in the hands of 10,000 retailers, large and small, scattered throughout the British Isles, the other half is owned by 17 Danish Bacon Factories which supply the carcasses. Such an organization, bringing together as it does, a single distributing body, the producers and consumers of a given commodity, lends to the Company great internal strength.

The Company in London undertakes to accept all suitable bacon as it is shipped from the 17 factories in Denmark, and it is its proud boast that it has never refused to handle all supplies shipped to it regardless of the condition of the market.

(To Be Continued.)

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co. have received the following letter from Mrs. Griffith, of 21 Merchison Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs,—I wish to thank you for the handy little booklet you sent me on the Care of Children. My baby boy was six weeks old when I first used Baby's Own Tablets, being new to Canada, but since the first proof of their many uses in bringing up a family, I have never been without them, for they are worth their weight in gold. There is no trouble in getting the little ones to take them and they often prevent an illness if taken in time. My first baby is now, at the age of four and a half years, a picture of health, and my nine-months-old baby is also well and happy. They are both a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them."

The booklet to which Mrs. Griffith refers is entitled "Care Of The Baby," and treats with what a mother ought to know for baby's sake. A copy of the booklet will be sent free to anyone requesting same from The Dr. Williams' Medicine Co., Brockville, Ont.

Toronto is to have a corn-borer inspector, but what is really needed is an official to get after folks who borrow books and never return them.

Some women wear gloves most of the time and others have diamond rings.

ITCHY PIMPLES AFFECTED FACE

Also On Neck and Body.
Healed by Cuticura.

"Eczema broke out in pimples and affected my face, neck and body. It itched and burned so that I was all the time scratching. My face was disfigured, and my clothing used to rub against the breaking out on my body and aggravate it. I could not get any sleep on account of it. The trouble lasted a couple of months. "I began using Cuticura Soap and Ointment and they afforded relief in about a week. I continued using them and in three weeks I was completely healed." (Signed) Miss Rosie Whitman, Beaver Harbor, N. S.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Stinchman, Ltd., Montreal." Price, Soap 25c. Ointment 25c and 50c. Tubes 25c. Cuticura Shaving Stick 25c.

HARVEST HELP FROM BRITAIN IS SUGGESTION MADE

London.—"The Canadian harvest will soon be due. Why not an arrangement between the Dominion and Home Governments and all the parties most likely to help for 10,000 Britishers to be provided with work during the coming harvest in Canada?"

William Lunn, M.P., of Rothwell, makes this suggestion in the Yorkshire Evening Post. He is an ex-chairman of the Overseas Settlement Committee, and still a member of that body.

"In July last year," he proceeds to say, an arrangement was almost arrived at for 10,000 to go to Canada, of whom 5,000 would be miners. The conditions were to give cheap passages, guarantee employment at not less than 4 to 5 dollars a day, and to assist in bringing those back who could not find permanent employment.

"One lady promised to pay the expenses for 150 South Wales miners, and others were prepared to help with smaller numbers. Just when everything was in order for the project being carried out, it unfortunately fell through.

"No doubt three out of four would settle permanently in Canada. Those who seriously desired to return should be helped in cost of passage home," he said.

These 7,000 or 8,000 who make their homes in Canada would become nominees. Then they would be likely to nominate their wives, sweethearts, sisters, brothers, and in many cases, their fathers and mothers.

That is the most satisfactory way of populating the Dominions. Here is the pebble which, if thrown into the pond, will begin the circle which is likely to enlarge and enlarge to enormous dimensions.

Cannot something be done, and done soon? asks Mr. Lunn, in conclusion.

Westerners Win Scholarships

Alberta and Saskatchewan Students Will Pursue Technical Studies

Quebec.—Chosen as the most outstanding and valuable member of the Canadian Society of Technical Agriculturists, Prof. H. M. Nagant, professor of geology and chemistry at the Oka Agricultural College, of the University of Montreal, was unanimously awarded the fellowship prize at the closing session of the agriculturists here.

The \$600 scholarship prizes, gift of the T. Eaton Company, were awarded to R. H. Bedford, of Alberta, to study soil bacteriology at McGill University, Montreal, and R. C. Russell, of Saskatchewan, to study plant pathology at Toronto University.

It was officially decided that the convention of the agriculturists next year will be held at Winnipeg.

Alberta Pool Making Interest Payments

Farmers Are Receiving Amount Due On Elevator Deduction

Calgary.—The Alberta Wheat Pool is issuing cheques covering the payment of six per cent. interest due on the elevator deductions from the crops of 1924 and 1925, it was stated at the offices of the pool.

The total payment amounts to \$87,101.03. In instances where the interest does not total the sum of one dollar, no payment is being made.

The six per cent. interest is paid on a total of \$1,345,384 which was the total deduction for elevator purposes from the 1924 and 1925 crops.

Danish Aviators Killed

Copenhagen.—Three Danish aviators were killed after leaping from a naval seaplane which exploded while they were flying over Copenhagen. The aviators, a pilot and two cadets, leaped from the plane but their parachutes failed to unfold and they fell on the roofs of houses, being killed outright. Their machine crashed in a densely populated area and injured a boy.

Appeal Was Rejected

Privy Council Gives Decision On Alberta Coal Case

London.—The decision of the Privy Council judicial committee rejecting Alberta's appeal in the coal mining tax case has the effect of depriving that province of large revenues which it had hoped to collect on the production from coal mines. The Privy Council upholds the decision of the Supreme Court of Canada that Alberta mine owners tax act of 1923 which placed a tax on every ton of coal mined in Alberta is ultra vires of the province.

The province's test case was launched against the Caledonian Collieries, Limited. The judgment of the Privy Council states that it is undisputed that though the tax was called a tax on gross revenue, such gross revenue is really an aggregate of the sums received from the sales of coal and is indistinguishable from a tax on every sum received from the sale of coal.

The judicial committee agreed with the judges of the Supreme Court that the tax was not a direct tax. Some attempt had been made in the argument to support the tax on the ground that it was analogous to income tax, but it was pointed out that there were marked distinctions between a tax on gross revenue and a tax on income which for taxation purposes means gains and profits. There may be considerable gross revenue but no income taxable as income tax in the accepted sense.

The appeal was therefore dismissed.

U.S. Farmers Complain

Say Canadian Competition Is Dangerous Factor In Agrarian Development

Seattle.—Canadian competition in grain growing has become a "dangerous factor" in the agrarian development of Washington, J. Carl Laney, state secretary of the farm bureau, testified at the Interstate Commerce Commission farm hearing. Agrarian representatives appeared before the commission recently, urging the necessity of lower export grain rates.

Supported by voluminous exhibits, Laney gave a comprehensive comparison of farming conditions between the grain districts of Western Canada and Eastern Washington. He asserted that aid given farmers by Canadian railways and the government was attracting growers from Washington to Canada.

With cheap land, low taxes, low grain rates and fertilizer, Alberta ranchers can not only raise grain at a cost of several dollars an acre lower than those of Washington, Laney said, but they can reach both their eastern and western markets at a much less cost.

Laney said the average cost to the Canadian farmer including everything until the grain was placed at elevators was \$14.70 an acre, whereas on the American side of the border line it was \$20.58.

He added that with such a wide spread in their favor the Canadian grain growers were rapidly driving Eastern Washington wheat from the export market.

Searching For Bodies Of Kamloops Victims

Eight Of Twenty-Two Have Already Been Recovered

Port Arthur, Ont.—A tug and launch have left here for Isle Royale to conduct a further search for bodies from the steamer Kamloops, which was lost off the Island last December.

The expedition has been organized by Captain H. J. Bryan, of Kingston, brother of Captain Bryan, of the Kamloops, and is financed by him and relatives of other missing ones among the crew of the Kamloops. It is proposed to patrol inland as well as along the shore line. Eight bodies of the 22 on the boat have already been recovered.

Is Successful Candidate

Toronto.—Miss E. Silver Dowling, lecturer in botany at the University of Alberta, is the successful candidate for the annual scholarship awarded by the Canadian Federation of the University Women's Clubs.

PRESIDENT OF THE I.O.D.E.

Mrs. John A. Stewart, of Perth, Ont., was elected national president of the Imperial Order Daughters of the Empire at the annual meeting in Toronto. She succeeds Miss R. M. Church, of Toronto, and sister of T. L. Church, M.P., who is retiring from that office after three years of work in the order.

Report Shows Big Increase

B.C. Department Of Agriculture Announces Gain In Production

Victoria, B.C.—Agricultural production in British Columbia in 1927 is valued at \$76,999,269, the highest sum on record, and an increase of \$5,637,000 over 1926, the Department of Agriculture announces.

Substantial gains were made in livestock, poultry products, dairy products, tanners, honey, hops and wool, while decreases were noted in fruits, vegetables and grains.

Imports of agricultural products from other provinces in Canada were valued at \$16,648,703, against \$17,437,350 in 1926, while imports from foreign points increased from \$3,622,011 to \$5,593,084. Exports of agricultural products for the year amounted to \$10,025,735, an increase over the previous year of \$1,617,095, or 19.23 per cent.

Will Form Pool

New Westminster, B.C.—Fraser Valley poultry men and women at a meeting here decided to form an egg and poultry pool in British Columbia. A committee was appointed to nominate a committee representing all poultry sections of the province which will draw up a constitution.

India Ready To Renounce War

Washington.—The Government of India has accepted the invitation of Secretary Kellogg to participate as an original signatory in the proposed multi-lateral treaty for the renunciation of war.

Ice Delays Seaplanes

Machines Ready For Survey Of Conditions At Fort Churchill

Ottawa.—Ice on the small lakes in the vicinity of Fort Churchill is holding up the dispatch of the two Canadian Air Force seaplanes which are in readiness to fly to the Hudson's Bay port for the purpose of surveying the break up conditions there.

It was stated at the Department of National Defence that the two planes are at present at Comorant Lake, North of The Pas, and are awaiting favorable conditions before proceeding to their destination. The duty of their pilots will be similar to that which has occupied the Hudson's Straits air patrol last year, to observe the movement of ice out of the Churchill River and through the inlet on the shore of which Canada's Northern port will be constructed. This year a wireless station will be built at Fort Churchill, the workmen, equipment and machinery for which will be taken there some time next month.

Cattle Shipped To England

Over Three Hundred Head Sent From Calgary Recently

Montreal.—The first shipment of cattle on the hoof to leave Canada for over a year arrived in Montreal at the East End stockyards over the lines of the Canadian Pacific Railway, on its way to England. Over 300 head of cattle were in the train of 17 cars, averaging 18 animals to a car, with a stockman aboard for the care of every 25 cattle that made the trip direct from Calgary to Montreal.

The shipment is being accompanied by Francis Burns, of Calgary, and Arthur Hilliard, veterinary surgeon, who supervises the health of the stock from Calgary to Birkenhead, together with a staff of stockmen under Archie McGinness, foreman.

Beatty On Trip To England

Quebec.—E. W. Beatty, K.C., president of the Canadian Pacific Railway, and Sir Herbert Holt, president of the Royal Bank of Canada, have sailed for England. While on the other side Mr. Beatty will let a contract for a new steamship of the Empire class, to be used on the Pacific Coast routes. It is tentatively arranged that Mr. Beatty will visit Stanley Baldwin, British premier.

"Flapper Vote" Bill Passed

London.—After an unsuccessful attempt had been made to raise the qualifying age, the House of Lords in committee last evening passed the franchise bill, which gives the vote to women 21 years of age and over. The House of Commons had already approved the measure.

HE DID IT IN ONE

Robin Bell-Irving, of Powell River, B.C., the first amateur to make a hole in one on the Jasper Park Lodge Golf Course. He accomplished it at the fifteenth, which has a name that speaks for itself—the Bad Baby. Incidentally, he is the first player, amateur or professional, to do the Bad Baby in one.—Canadian National Railways Photograph.

SIR A. CURRIE NEW PRESIDENT CANADIAN LEGION

St. John, N.B.—General Sir Arthur Currie was elected president of the Canadian Legion of the British Empire Service League at the second annual Dominion convention here.

Following the announcement of his unanimous choice a telegram of congratulation was dispatched to the former leader of the Canadian troops in France, coupled with the wish for a speedy recovery to health.

Lieut.-Gen. Sir Percy Lake was named immediate past president.

The importance of not bringing boys and girls of tender age, unaccompanied by parents or guardians into Canada was stressed in debate as was also the necessity of setting before foreign immigrants Canadian ideals before they could be corrupted by communistic teachings.

A. E. Moore, Manitoba, was re-elected national chairman and presided during the deliberations, when many resolutions were brought in by delegates of the various provinces. Some of the most important of these—to the Dominion as a whole—were submitted by the committee on immigration and colonization, headed by P. Shelton, of Regina.

The recommendation of this committee included a complete Dominion survey of the immigration and settlement problem, the barring of Orientals from Canada's shores and the banning of Communist literature and publications in this country.

The report of the immigration and land settlement committee, which was adopted, recommends that every effort be made by the government to have at least 50 per cent. of all immigration from Britain; that persons who are not prepared to accept Canadian citizenship in peace and war be not encouraged to come to Canada; that every effort be made to prevent the location of non-English speaking peoples in large blocks, and that "free passages to British boys and girls, when accompanied by parents or guardians, should be confined to those who have attained the age of 17 years and over."

The sections of the report recommending that provincial commands urge the branches to organize committees to survey the farm employment possibilities and settlement in their districts, and for a closer co-operation between the British and Canadian legions for a better selection of men suitable for settlement in Canada were adopted as presented.

Forke Will Tour West

Minister Of Immigration To Visit Western Canada Shortly

Ottawa.—Hon. Robert Forke, Minister of Immigration, will visit Western Canada this summer on immigration matters.

Mr. Forke's trip will carry him through to the Pacific Coast. The itinerary of Mr. Forke has not yet been arranged, but the likelihood is that he will leave Ottawa within the next three or four weeks, visiting all the important Western cities. A definite announcement of his program will be available shortly.

Mr. Forke probably will seek provincial co-operation in immigration work as recommended in the report of the parliamentary immigration inquiry presented during the recent session of parliament.

Conference a Success

First Annual "Farm Women's Week" Held At Saskatoon

Saskatoon.—Close to 150 delegates attended the first annual "Farm Women's Week," at the University of Saskatchewan. The conference, arranged by the United Farmers of Canada, Saskatchewan section, in co-operation with the University of Saskatchewan, was a most successful venture, and is the first of its kind held in the province and, so far as is known, in Canada. As much of the business of the program concerned only the United Farmers' Organization, some of the sessions were closed to the press and public.

A statue of William Shakespeare, cut in glass and over 24 feet high, has been made for a London Park.

Millions of Acres of Farm Land In the Western Provinces Still Available For Settlement

Information furnished by the department of the interior provides some interesting light on the extent of farming lands now available for settlement in Canada.

The bulk of farm lands available, of course, is in the western provinces. In Manitoba, Saskatchewan, and Alberta, there is altogether a total of 293,639,144 acres of land in the surveyed area. Of this amount Alberta has 87,889,701 acres, Saskatchewan, 78,613,310 acres, and Manitoba, 27,136,133.

It is rather surprising to note that of the total acreage in the surveyed area of the three prairie provinces, there remains but 23,167,000 undisposed of, or available for homestead.

In addition to the area of surveyed lands undisposed of there is available for settlement some 73,000,000 acres held by other interests. The Hudson's Bay Company holds 7,026,800 acres, the railways have 31,782,655, for school land endowment purposes there is a reserve of 9,312,700 acres, and now under grazing lease there are 25,799,600 acres, practically all of which represents farm lands.

Of the above total, aggregating 96,000,000 acres, a large proportion is at present rather remote from railway and transportation facilities, and much of it is in the dry belt or otherwise not suitable for immediate farming operations. The exact extent of the land suitable for farming purposes is not known although the topographical survey branch of the department of the interior has done a good deal of work in the direction of soil survey in recent years and has plans made for continuing the work over the next few years.

There is another factor contributing to the area of lands available in the three prairie provinces, of which Manitoba has 2,400,000 acres, Saskatchewan, 7,500,000 and Alberta, 8,500,000.

In British Columbia it is estimated there is a total of approximately 18,400,000 acres of such land available as well, that is the land held by private owners for purely speculative purposes. It is estimated that for farm settlement in the western provinces and in the old provinces that there are in the neighborhood of 4,500,000 acres of good farm land available for settlement along what is known as the railway belt and in the Peace River District.

There is therefore approximately 119,067,000 acres of land available for farm settlement in Canada west of Ontario.

To Overcome Goitre

New Discovery Is Outlined At Meeting Held In Toronto

The discovery of a chemical compound which will compensate for deficiencies in the thyroid gland—which gland not only controls the growth of individuals but is responsible for that insidious growth, goitre was outlined by Prof. George Barger, F.R.S., at a meeting of the Canadian Chemical Association at Toronto.

One of the principal elements in thyroxin is iodine, and it was found in the United States. He demonstrated with a map, that the less iodine in the water supply of a district the greater was the growth of goitre.

A Scotchman was asked what he would do if someone left him a thousand pounds, and he replied: "Count it."

"But, Dick, if your wife knew?"
"She would tear my hair."
"Don't flatter yourself." Der
Brunner, Berlin.

To Call Ourselves Canadians

National Council Of Women Sees Desirability Of Building Up Strong Canadian Citizenship

Establishment of a foundation fund of \$200,000 for the endowment and maintenance of the council, election of officers for the year, and the passing of two resolutions featured the closing session of the annual convention of the National Council of Women, held at Toronto.

A resolution on the use of the word "Canadian" was passed as follows:

"We have a federal statutory right to call ourselves Canadians, therefore we recommend that the provincial councils petition the provincial governments asking that in the matter of vital statistics, registration of births, issuing of death certificates the word 'Canadian' shall be used by those entitled to do so, and that as it is desirable with a view to building up a strong, loyal and homogeneous Canadian citizenship as an integral part of the British Empire, that the citizens of Canada, whatever their race or origin, should be designated as 'Canadians.'"

A Charming Frock For the Larger Woman

The attractive novelty silk crepe model pictured here is one of the season's smartest frocks. The long collar and front panel are of contrasting material and give the much-desired slenderizing lines. There is a shirred inset at each side of the front, tucks at the shoulders, and long sleeves gathered into wristbands. Sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 38 requires 3 1/2 yards 36-inch, or 2 1/2 yards 44-inch material. Price 25 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

PRINCE HENRY

The most recent photograph of Prince Henry, the Duke of Gloucester, who will accompany the Prince of Wales on a trip in the autumn to British Africa.

The Granting Of Credit

Banking Facilities Available To Farmers Have Greatly Improved

Credit used to be extended for the most part only to governments and rulers and potentates. With the growth of commerce came commercial borrowing. But the granting of banking credit to individuals not engaged in commerce only recently became an important factor in this country.

To buy on the installment plan meant the granting of credit on a scale never before known. This credit was extended by the seller, but the installment seller usually turned to some financial institution to share the burden.

Meanwhile machinery has been organized in most parts of the country to enable farmers to borrow on reasonable terms. The banking facilities available for our farm folk today are incomparably better than they were even a few years ago.

Both movements represent the democratization of credit.

The Effect of Sun Spots On Living Conditions Is the Subject of Scientific Investigation

The Sun is usually looked upon as a permanent body radiating steadily a life-giving stream of energy. True, he comes and goes with day and night, and rises and declines in the heavens with the changing seasons, but these apparent defections are ascribable to the vagaries of the earth. However, on many occasions during the past twenty centuries, keen eyes have detected and recorded the presence of dark spots on the Sun, at times when he was sufficiently dimmed by smoke or haze to be closely observed. These spots march across the surface of the Sun indicating a period of rotation of about twenty-six days. They wax and wane in size and numbers in an irregular period with an average length of about eleven and a half years. The telescope and spectroscope reveal the fact that the dark spots are accompanied by brilliant clouds especially rich in the light of glowing hydrogen and of calcium, the ultra-violet light of the latter constituting a relatively large proportion of all the ultra-violet light of the Sun.

Ultra-violet light has the power of disrupting gases at low pressure and liberating electrons. Hence it is not surprising that the northern lights and magnetic effects on the earth have been found to pulsate with the spottedness of the Sun.

It has been observed also that the polar caps of the planet Mars melt more rapidly when spots are plentiful on the Sun than when they are few in number; and that Encke's comet in its return every three and a half years is brighter at or near the times of sun-spot maximum than at minimum; and also that certain errors in the predicted positions of the Moon and planets coincide with a longer period in solar spottedness of sixty or seventy years. Consequently, it has not been without reason that a great number of investigations have been made in the search for a relationship between the variations in the Sun and in the weather and in living things. This is one of the objects of research at the Dominion Observatory, Department of the Interior, Ottawa.

In such a search effort has naturally been mainly confined to those records, unfortunately too few in number, which cover long periods of time. Scanty as they are they have revealed an eleven-and-a-half-year period ex-

isting in various terrestrial phenomena, and in a few cases where records of both living things and the weather were kept, the relationship to sun-spottedness is still more convincing.

In the case of the auroral and electro-magnetic effects, as mentioned above, the relationship is at once apparent; in that of rainfall in some localities the pulsation of eleven-and-a-half-years (in the mean), shows a decided correspondence to the solar variations; temperature, barometric pressure, and numbers of storms have likewise shown the same periodic pulsations. A similar rhythm has been noted in dates of migration-arrivals of birds in France (Chandon records, Montdidier); numbers of rabbits in Canada (records of Hudson's Bay Company); marriages, births, and deaths in Russia (for the longer period of seventy years); influenza; growth rates of cotton and of corn in some localities in the United States. But perhaps the most valuable of all records are those obtained from the varying thickness of the annual rings in the giant redwoods of California during their three thousand years of growth. The measurements of these rings correspond so conclusively with the European records of sun-spots of the last three hundred years, that they may be regarded as yielding information concerning the solar variations during the centuries for which we have only the fragmentary Chinese records of sun-spots. The existence of the eleven-and-a-half-year sun-spot cycle and its reflection in terrestrial conditions, probably many thousand years ago, appears likely from the testimony of a Sitka spruce recently released by the recession of a glacier in northern British Columbia and measured at the Dominion Observatory.

We may confidently look forward to the time when accumulating knowledge of sun-spots and other solar effects will provide a basis for valuable predictions concerning the weather and living and economic conditions. At the present time, however, notwithstanding statements which have appeared in the press, our knowledge is too incomplete to make definite predictions. The realization of our dependence, and that of all the forms of life within our ken, upon the Sun is inducing astronomers, scientists, and statisticians, the world over, to bend their efforts to a clearer elucidation of the relationships of sun-spots and other solar phenomena to conditions on the Earth.

Demand Exceeds Supply

Government Poultry Plant at Oliver, Alta., Doing Large Business

Over ten thousand chicks have been distributed during the past spring from the Provincial Government poultry plant at Oliver, Alta. Officials in charge of the plant report that the demand has been greatly in excess of the supply and that many applicants have been referred to other breeders and hatcheries for their requirements. The breeds represented in the shipments include White Leghorns, Barred Rocks and White Wyandottes. Over three thousand and chicks are being reared on the farm this summer. In view of their increasing economic importance, a beginning is being made this year with turkeys.

No man can make a mountain, but the majority can make a big bluff.

AUTO-SUGGESTION

"You are I! My being is in yours. What do you feel?"
"That your breakfast did not agree with you."—Jugend. Munich

Two High Hatted

Captain McPhee is very high hat. The "Beaver" was presented to him by "Miss Fort William" on behalf of the harbor officials upon the arrival of the Canadian Pacific S.S. Keewatin, the first steamship to reach the head of the lake this season.

Incidentally, this vessel opened the port of Sault Ste. Marie, where the skipper received his first topper. Captain McPhee thinks that the hats may be handy when he receives Kings and potentates aboard the Keewatin this summer, but he will stick to uniform on the bridge.

POOR SALARIES PAID SCIENTIFIC AGRICULTURISTS

Ottawa.—A motion to go into supply in the House of Commons prompted C. G. Coote U.F.A., Macleod, to protest that salaries paid to men in the scientific and technical positions of the department of agriculture were inadequate.

Mr. Coote declared that the department of agriculture was losing the professional men because of the low salaries which were paid. He gave a comparison between salaries paid in the United States service and in the Canadian to illustrate the fact that Canada paid much less than the U.S.

The professional service of Canada said Mr. Coote, must compete with that of the U.S. for men. As things now stood many Canadians went to the U.S. to take post-graduate university courses. Frequently they remained there because of the fact they could obtain more money in that country.

Mr. Coote compared salaries paid in the cereal division of agriculture with those paid in the geological survey. The figures he quoted showed that the salaries in the cereal division were lower. Canada could not afford to lose her scientific agricultural men, he declared. Agriculture was Canada's basic industry and wheat growing was the most important phase of that industry.

J. S. Steedman, Liberal-Progressive, Souris, declared the question of the salaries paid to scientific agricultural men was one of the most important matters which had come before the house this session. It should be realized that the prosperity of Canada depended largely on her agriculture, yet the ravages of disease were spreading in certain quarters of agricultural Canada, and it was of prime importance to the Dominion as a whole that adequate salaries be paid our scientific agricultural officials so that their research efforts could be used for the benefit of agriculture in this country.

Inspection Satisfactory

Objection To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto. — "We have examined every single objection that has been raised against the examination overseas by Canadian doctors of assisted passage immigrants and we have not found one that will hold water," declared Dr. David Clark, assistant Deputy Minister of the Department of Natural Health, in an interview here.

Articles appearing in certain sections of the British press against the policy of having Canadian doctors conduct examination of immigrants were full of inaccuracies, he said.

"The causes of a decrease in immigration to Canada this year," continued Mr. Clark, "lie deeper than the medical inspection policy. One of the causes for the decrease of immigration from Britain, he felt, was the feeling of increasing optimism there."

A Martyr To Science

Noted Doctor Is Latest Victim Of Scientific Research

London. — News was received here of the death of Dr. William Alexander Young, director of the Gold Coast Colony, Africa. Dr. Young was a co-worker with Dr. Hideyo Noguchi, who died recently at Accra, of yellow fever, resulting from his researches into the origin of that disease.

It is believed here that Dr. Young contracted the disease in the course of his researches with Noguchi.

Young was of Scotch descent and had a long experience with tropical diseases. In 1924 at the comparatively early age of 35 he was appointed to his present position.

Tornado Near Kansas City

Kansas City, Mo. — A tornado struck Englewood, a suburb between here and Independence, Mo. Two street cars were reported wrecked. Ambulances were sent to the scene.

W. N. U. 1736

Record During March For Canadian Roads

Railways Carry More Freight Than In Any Previous March

Ottawa.—The Canadian railways carried more freight during March, 1928, than in any previous March. Gross revenues also were the largest earned in March, exceeding those of March, last year, by \$2,135,479, or 53 per cent. Although operating expenses were heavier than in 1927 by \$1,252,220, or 3.9 per cent. net revenues were larger by \$883,259. The large carry-over of grain has been an important factor in the heavy traffic and earnings of the railways during the first quarter of 1928, the movement of grain to the Pacific ports being particularly heavy. The March payroll was heavier than in 1927 by \$1,037,133, and the average number of employees increased by 3,022.

The Canadian National Railways increase in gross revenue, compared with March, 1927, was \$756,717, or 4.5 per cent. for an increase in freight of four per cent, and a decrease in passenger traffic of 6.3 per cent.

The Canadian Pacific Railway gross returns for March were heavier than 1927 by \$1,354,348, or 8.8 per cent. Passenger and express revenues showed decreases but all other accounts were larger, freight by 12.5 per cent.

Operate On Cost Basis

Alberta Wheat Pool Elevators Adopt New Policy

Calgary.—Wheat Pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by a full attendance of Pool delegates in convention here.

The new policy laid down will represent something new in co-operative effort in Canada, if not in the world. It means that the members will be charged only the bare cost of operating the elevator facilities.

When they haul their grain into Pool houses no service or elevator charges will be made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final Wheat Pool payment.

This change in elevator policy was recommended to the delegates by the directors. The proposal was to eliminate handling and service charges upon delivery of the grain to the Pool elevator and deduct the actual operating cost on a per-bushel basis from the final Wheat Pool payment.

Has a New Mission

Premier King Requested To Arrange For Necessary Rainfall To Ensure Good Crops

Ottawa.—Premier King has a new mission. The latest request is that he shall appoint himself rain-maker extraordinary to Saskatchewan.

"We have had a wonderful seeding time and everything is now in the ground in good shape," runs a letter from Saskatchewan, which Senator Laird read in the Senate recently. "I wish you would draw the attention of the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to deliver the greatest crop Western Canada has ever produced."

Vote Sum For League

Ottawa.—The House passed a vote of \$155,968 for Canada's contribution to the League of Nations. Hon. Hugh Guthrie brought up the question of German currency held by the Canadians, which had been repudiated by the German Government. The Prime Minister pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

Inquiry Is Ordered

Ottawa.—The parliamentary immigration inquiry has approved a motion for a return showing all special immigration permits issued from January 1, 1920. The report will show the number of permits, officially termed letters of admission or assurance granted to members of parliament and others.

Germany has a shortage of skilled labor.

May Receive Appointment

The possibility that a Canadian judge will take the place on the permanent court of international justice of The Hague left vacant by the resignation of John Bassett Moore, of the United States, is now openly acknowledged in well-informed circles at Washington. Already, it appears, the name of Mr. Justice Riddell, of Toronto (above), as well-known almost in the United States as in Canada, is mentioned as a likely successor to the American jurist.

Bill Defeated In Senate

Government Measure To Amend Naturalization Act Thrown Out In Upper House

Ottawa.—The Government bill to amend the naturalization act was killed in the Senate.

The bill would have placed authority for the granting of naturalization certificates in the hands of the secretary of state without its being necessary for the applicant to make prior application to courts, as now required.

The bill met stormy opposition in the Commons.

It was discussed at some length by the Senate recently in committee of the whole. Eventually Senator Laird moved that the committee rise. This was carried by 38 to 20. The effect was to kill the bill.

Senator Dandurand, Government leader, explained the measure, which he said would simplify procedure and prevent abuses. The state department had a well-trained staff to handle the work. Experience had shown that court inquiries on naturalization were absolutely useless.

Inmates Of Canadian Prisons

Ottawa.—Canadian penitentiaries have at present a total of 2,580 inmates. Of this number, 2,539 are men, and 41 are women. Canadian born number 1,614, and in all 48 nations are represented. This information was given in the Senate in reply to a question by Senator J. P. E. Casgrain.

Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. Bi-weekly in each direction between Toronto, Ottawa, Montreal and Rimouski, where the steamers are met, the new service cuts two days off the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

U.S. Honors War Dead

Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington. — The White Crossed rolling hills of Arlington beckoned thousands of citizens, soldiers and sailors of the national capital for the annual memorial service, May 30, at the graves of the fallen heroes of all wars.

For the first time since he entered the White House, President Coolidge led the nation in memorial day exercises outside of Washington. His annual tribute was paid in an address near the spot where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington.

Sir Esme Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the exercises in Arlington cemetery, where they decorated the graves and the Cross of Sacrifice erected by the Canadian Government in memory of Americans who died while serving as members of the Canadian corps.

Ontario Joins Manitoba

In Legal Fight With Federal Government Over Regulation Of Securities

Toronto.—Announcement has been made by Hon. W. H. Price, Attorney-General for Ontario, that the province is joining with the province of Manitoba in the latter's legal fight with the Dominion Government over the question of certain rights in connection with the regulation of securities.

Edwin Bayly, K.C., Deputy Attorney-General, will leave for England June 15, and will appear with Hon. W. R. Craig, K.C., counsel for Manitoba, when the case is heard by the Privy Council early in July.

Receive Degrees At McGill

Honorary Degree Conferred On Five Distinguished Candidates

Montreal.—The honorary degree of Doctor of Laws was conferred on five distinguished candidates at the 1928 convocation of McGill University.

The recipients were: Sir Wilfred Grenfell, famous Labrador missionary; Rev. Canon Cody, Toronto; William Reid Blair, director of the New York Zoological Park and a graduate of McGill; George Isles, writer, and Julian C. Smith, financier.

Sir Arthur Currie, principal, had not sufficiently recovered from his recent illness to be present.

Appoint Conciliation Board

Ottawa.—A conciliation board has been appointed to investigate the carpenters' strike in Calgary. Mr. Justice Clarke will be chairman. James H. Gordon will represent the employers, Robert Hewitt, the men. The men are asking for an increase of 12½ cents an hour.

COOLIDGE MAKES STRONG PLEA FOR WORLD PEACE

Gettysburg, Pa. — In the first speech to be delivered by a president on the Gettysburg battle field since Lincoln's immortal address, President Coolidge, in connection with the Memorial Day exercises, voiced a plea for the abolishment of war as the fittest tribute to the war dead of America.

At the same time he demanded less indifference to crime in the U.S. and condemned what was described as a tendency of the legislatures to exceed the powers granted to them by the constitution. These things, he said, tended to weaken the regime of law and breed turbulent populations, prone to war.

Declaring the "one thing we want above all else for ourselves and for other nations is a continuance of peace," Mr. Coolidge reviewed negotiations by the state department for treaties against war and for arbitration treaties.

The Briand proposal that the United States and France sign a treaty to renounce war was described by the President as having developed into "one of the most impressive peace movements that the world has ever seen."

"It is my earnest hope that success may crown the negotiations now in progress and that the ideals which have inspired the French minister of foreign affairs and the secretary of state of the U.S. in their joint efforts to find a solution of the problem of peace, may find a solution of the problem of peace."

Would Provide Work For Ex-Service Men

Resolution Favors This As Best Memorial To Earl Haig

London.—The ex-service men at the British Legion conference passed a resolution to the effect that the best tribute that could be paid to Earl Haig would be providing work instead of relief for ex-service men.

Lady Haig was present and said this would have met with the approval of her husband, whose desire would have been, not a statue of himself, but that the men who had fought in the war should be helped.

It is understood that the resolution and Lady Haig's remarks were not intended to deprecate the idea of a national memorial to the late Field Marshal, which the Government is now considering.

British ex-service men will attend the conference of ex-service men, including former enemies, to be held at Luxembourg next September.

Replace Provincial Police

R.C.M.P. Have Taken Over Work Of Saskatchewan Force

Saskatoon, Sask. The Saskatchewan Provincial police force passes into the pages of history of the northwest, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan sub-division being under the direction of Inspector John Kelly, who transfers from the disbanded force to the "scarlet riders." Some other members of the S.P.P. will join the R.C.M.P., while the following members of the latter force, located at the Saskatoon detachment for some time, will carry on: Sergt. A. Drysdale, Detective Sergt. C. E. Hildyard, and Constables T. Theriault and E. W. English. The first two have a long service record in the force, dating back to the old Northwest Mounted days.

Against Fast Time

Vancouver. — Vancouver residents will continue for the remainder of this year to work and play on standard time. By a vote of more than four to one the citizens today voted against adoption of daylight saving time for the summer months.

Complain About Expenses

Ottawa. — Complaints of Canada House were heard in the House when a vote of \$70,000 for contingencies and \$39,000 for salaries for the high commissioner's office in London were under discussion. After considerable debate, the item carried.

Railways and Aircraft Companies In United States Join Hands To Supply Transcontinental Service

This aviating generation will probably not be able to annihilate space, but it is certainly destroying distance. Air lines to the other planets and the nearer stars are not yet in sight, but the stretches of the earth are being turned into aerial taxi jaunts. Also, as is man's habit when he is determined to cover great distances in brief time, the earlier hardships of swift travel are being eliminated. The latest combination of speed with comfort is announced in the formation of the 'plane-train service to Los Angeles from New York and return.

It has not yet been begun, but the personnel of its sponsorship assures its early establishment. Within a few weeks it will be possible to reach Los Angeles in forty-eight hours from New York, with two nights of sleep aboard a Pullman. Two railroads — the Pennsylvania and the Atchafalaya, Topeka and Santa Fe — the two leading aircraft companies — Curtiss and Wright — and many strong banking houses have combined in the project. Capital stock up to \$5,000,000 has been subscribed with no public offering, and the company is about to publish its rates, its time schedules and the names of its pilots. The 'planes, which will carry transcontinental passengers during the daylight hours, have a capacity of fourteen persons each; meals will be served in the air as on the Pullmans; and the tourists will be in their hotels at Los Angeles or New York before the light fades on the second day. It is part of the new miracle wrought by the union of science and finance, with 'planes and railroads acting as auxiliaries instead of rivals. Passage by air has become a conventional daily affair in Europe, where generally the scope of men's business interests requires a journey only from one country to another and without the handicap of such distances as we have here. To meet the spread of this broad land the new combination has been devised by men equally responsible for management and for transportation. It may be only the beginning of an entirely new system of general travel in this country.

Trips to the moon will probably have to be left to succeeding generations, which will have left only interstellar spaces as their objective. But news like this about the train-plane almost leads ordinary citizens to expect a time when their vehicles, Pullman cars by night will take wings by day and, rising from the tracks, carry them through the air until night comes again. New York Times.

To Study Distance Of Stars

W. F. Harper, assistant director of the Dominion Observatory at Victoria, B.C., told the members of the Royal Society of Canada, that at the Victoria observatory a study was being made to determine how far away the stars were from mother earth.

The most extensive, interesting and readily accessible field for alpine climbers today is found in the Canadian Rockies, particularly the portions included in the national parks of Canada.

When I started out in the world I had but a dollar.

"What did you do with that?"

"Wired home for some more."

"Can you lend me ten kroner, old man?"

"On principle, I never lend money on the first of the month."

"But today is the second."

"The second? Yes, and I never have any left on the second!" Kasper. Stockholm.

Beef Cattle Market

Good Prices Are Secured For Prime Beef

J. T. McCallum, of Melita, Manitoba, last month sold 24 head of prime beef grade Shorthorn and Hereford steers at prices ranging from \$10.50 to \$12. per hundred pounds to a Winnipeg buyer. The same buyer purchased 15 Aberdeen Angus steers from George Tait, a well known breeder, of Warren, Manitoba, for \$11.50 per hundred weight. These steers dressed 62.5 per cent. They were purchased last October for \$7.50 per hundredweight. At that time they weighed 1,015 pounds, which had increased on farm grown feed to 1,308 pounds at time of slaughter. The grand champion car lot at the Calgary and Edmonton spring shows was sold at \$15. per hundredweight. They were Herefords and were raised by W. P. Fleming, of Calgary.

Farmers' Profitable Venture

Farmers Of Manitoba Own Creamery Valued At \$90,000

Since the Manitoba Co-operative Dairies, Ltd., Winnipeg, began operations in 1921, it has returned to its farmer patrons in interest and bonuses, in cash or credit, nearly \$75,000, according to a recent report by the management. During the same time the members of the association have subscribed and paid for capital stock in the organization to the amount of \$77,202. Thus the farmers of Manitoba now own the creamery and its equipment, valued at \$90,000, and have received refunds practically covering their investment. At the same time they have received better prices for their butterfat, and the quantity of butter produced has increased from about 300,000 pounds in 1921 to 1,637,000 pounds in 1927.

A Toronto controller wants to know if there is any difference between stealing a dollar and stealing a million dollars. There is the trifling difference that one crime usually involves a term in jail.

A conspicuous sign displayed on a

Kind Old Gent: How old are you, my little man?

Small Boy (tersely): Eight.

"And what are you going to be?"

"Nine."

Mosquito Control

Circular Gives Instructions Regarding Permanent and Temporary Control

The females of the majority of species of mosquitoes drink blood, and warm-blooded animals and man are the sources of this particular form of mosquito food. This makes the mosquito an interesting subject for study, and a circular, just published by the Department of Agriculture, entitled "Mosquito Control in Canada," is timely.

While some of these predacious insects only live for a few days others live for several weeks, and the best way to control them is to make an attack on their breeding grounds. The Entomological branch advocates in this circular the draining and filling in of low places where water accumulates, and the screening of receptacles holding water such as water-barrels. Temporary bodies of water formed by melting snow, rain and floods are common breeding places for mosquitoes.

"Mosquito Control in Canada," which may be obtained on application to the Publications Branch, Department of Agriculture, Ottawa, deals at length with the life history, permanent and temporary control measures, procedure in control campaigns, and protection from mosquito bites. Those who desire to identify the particular species common to their district may send specimens for identification to the Dominion Entomologist, Ottawa.

Plate Glass Plant For Fort William

It is announced by Frank Spence, M.L.A. for Fort William, that the Feldspar Glass Company, of Oshawa, intends locating a factory at the head of the lakes for the making of plate glass. The company is negotiating to take over the plant and equipment of the Canada Steel Co., located on the Kaministiquia River, with both rail and shipment facilities at hand. The new industry is expected to give employment to about a hundred workers.

Roman roads built before the birth of Christ are now lighted by electricity.

The wise worm doesn't crawl out until after the early bird has eaten his breakfast.

A bright future for the Canadian sheep industry is painted by S. F. Hollings, editor of The Wool Record, of Bradford, the wool-marketing centre of England. Mr. Hollings visited this country in 1927.

"As I travelled through Ontario, Manitoba, Alberta and Saskatchewan, I could not help asking: 'Where are the sheep?'" writes Mr. Hollings. "Apart from passing a small flock or two on the train I had little opportunity of seeing them."

"It was too early to see any of the new clip, much as I desired to do so. The wool I saw was specially suitable for hosiery manufacture. This will always be a big industry in Canada, the climate making warm underclothes essential. The mills are evidently doing their best with the raw material available, and I was pleased to see that farmers are keeping a suitable type of sheep, I should say that the bulk of the wools range from 50's to 58's quality. I was asked if I thought manufacturing needs are such that the flocks in Canada could be increased to 25,000,000, and unhesitatingly replied in the affirmative."

"I have never known a time in the history of the wool trade when the outlook for sheep men was so encouraging. I am not among those who anticipate lower prices. Mutton values are also good, and I think the outlook is of the best. While every other class of farm produce has fallen in value in England during the past two or three years, those who have kept sheep have found both mutton and wool to sell well. I would appeal to every Canadian farmer to keep as many sheep as possible, because I think it will pay him to do so. Since returning home I have given three lectures on my trip to Canada, and in these as well as on every other possible occasion, I have endeavored to emphasize the opportunities in Canada for any one with sufficient pluck and enterprise."

"One of the most satisfactory things about my trip was that I met so many Yorkshiremen who had gone out to Canada and made a success of the enterprises upon which they had entered. Sometimes discouraging comments are made upon industry in the Old Country, particularly its agriculture. I hope Canadian readers will not accept all such comments literally, for there are many prosperous farmers in England."

"If Canada is to fill its place in the Empire it needs men of the same type to extend its pastoral and agricultural interests. Quite a large number of Englishmen with a good knowledge of the sheep of their native country have settled in Canada, and these should be able to give some good advice, particularly after they have lived long enough in Canada to become acquainted with its climatic peculiarities."

Building Elevators Rapidly

A new grain elevator every two days has been the record established by the Manitoba Wheat Pool since building operations began this spring. Close to eighty new elevator points have been organized this year, and new elevators will be erected at nearly all of them. In building these Manitoba Pool Elevators over three hundred men divided into fourteen crews are employed.

Judge—"So you and your wife had a fight? How would you like to go to jail?"

Undersized Husband—"Oh, very much, sir."

Doctor: "Where do you feel ill?" Patient: "At work!"—Lustige Kolner Zeitung, Cologne.

CANADIAN ORATORY CONTEST

For the second year in succession, the Canadian Oratory Championship, held at Toronto Arena, attracted a phenomenally vast audience, numbering nearly ten thousand. These photographs show, at the left, Wm. Fox, Jun., of De La Salle School, London, Ont., declared champion of Canada by the judges, who numbered five, one nominated by each of the participating provinces. Upper right, Miss Swanbald Matthison, of Duke of Connaught High School, New Westminster, B.C., who was declared second, and lower right, Miss Alice Muse, of the Roblin Consolidated School, Dauphin, Manitoba, who came third. The other contestants were Miss Margaret Kinney, of Victoria High School, Edmonton, and Edison Smith, of Pownal, P.E.I. Fox gets a free trip to Europe after which he will represent Canada in the international contest at Washington.

CHAPTER XXVI.—Continued

Mrs. Kalinski looked very smart in her black satin tea-gown and gold embroidery that her Isadore had brought from the store. She took her neighbour into her confidence. "No matter what I could say, mind you! The woman said she paid seventy dollars for it once, and Isy got it for fifteen. She wanted thirty, but Isy told her it was the worst thing to sell. Who was wearing tea-gowns now?—they was out of date like leg o' mutton sleeves. And all the time Isy was thinking of me. I had a red cashmere one with Watteau pleats when our Rachel was comin', and his papa says little Isaac will be served as good, even if it did cost fifteen dollars and could be sold for thirty easy. He's that good a man, and spares no expense in reason."

Mrs. Corbett brought the tea from the kitchen and filled the cups. "You and me are lucky women," she said, "to have two good men like we have. Ain't some of them the easy goin' devils, though? I don't know what to think of Helmi's man, though she sticks up for him and is afraid he's been lost in a storm or drowned in a

river. Poor girl—it's a shame to see her havin' to work in a Chiniks, but what could the poor girl do? Not one of these dainty ladies would have her, they all had some reason."

"If she were just a Hebrew girl, now," said Mrs. Kalinski, "one could go to the Hebrew Association of Women and they would find a place for her. We would not have any nice white girls of ours workin' in a Chinese shop and havin' to take lippy talk from every Harry, Tom, Dicken, and maybe worse. Mrs. Sternborg and Mrs. Swartz are grand on that, and good girls they have found for our people."

Mrs. Corbett paused, with her saucer half way to her mouth. "Look at that now! Ain't the Jews wonderful to think of things? We've got grand societies, too, and I never once took thought of them. Sure we've got societies. They're all up to their eyes in pneumonia jackets and many-tailed bandages now, and socks for the soldiers, but they're grand women, too. When I came here first I used to take care of the Club room at the 'Y' and I used to see them there millin' round, very civil spoken women, too, and tryin' to make the world better, and God knows it needs it: I'll go to Mrs. Bell, the old lady, and I'm glad you spoke of this, Mrs. Kalinski. Maybe we can get a decent place yet for Helmi, though if she takes the baby away, I don't know what I'll do with Rose and Dan."

Mrs. Corbett went that evening, after Helmi had gone to work, leaving the baby to the watchful care of Rose, who sat in No. 18 to do her lessons.

Mrs. Bell was at home, and would speak of Helmi's case at the meeting of the Lloyd George Chapter the next day.

A week later a new place was found for Helmi. Mrs. Bell said it was an ideal place, and while ten dollars a month was very little, still it was not every place she could have the privilege of keeping her baby, and Mrs. Herriott would be very kind to her. Mrs. Herriott was young and inexperienced, and found her baby a great care. Helmi could mind the two babies and Mrs. Herriott would do the work.

Old Sam was sorry to part with Helmi, and gave her a feather fan. "You come back some day—old Sam be glad. Good girl—cally tray—teachee make chop suey—come back! You come see my girl too, and have chop suey."

Helmi paid her rent at the "North Star," and had three dollars left.

The Herriott home was a six-room bungalow on 127th Street, three blocks from the car line on 121st Street. It was a little house, low-roofed, square, with but little pitch in the roof, and high pillars in front, much too high for the height of the house, giving one the sensation as Helmi thought of seeing a cow getting up hind legs first. Rosie and Danny conducted her to the place, Rosie carrying the baby and Danny helping Helmi with the heavy valise.

"I hope you don't like her," said Rosie, "and then you'll come back. I'll bet her baby cries more than ours, and just when you get little Lili asleep, her kid will wake up whinin'. Well, anyway, Helmi, you can always come back, and we'll manage some way."

Helmi kissed her two good friends at the back door, but Rosie refused to go until she saw if the lady were at home.

"Maybe she's changed her mind," she said speaking from her experience with ladies—"or has got help—or somethin' has happened. You can't depend on these women in the West End. Ain't that right Dan? They don't pay their debts, either, very good. They always say 'Come back again.' Dan collected for a tailor, and he knows. They don't remember anything less than five dollars, and when they're stuck for another excuse they peep out of one of the windows to see who it is, and won't let you in."

Mrs. Herriott was in and had not engaged anyone else, and so the escort had to go home alone, which they did regretfully.

Helmi found the house in a state of siege. Confusion reigned everywhere. The invader slept in a baby carriage which filled the greater part of the living-room, and when he slept all noises were muffled. The grandmother, who had been conscripted into service, padded about in her bedroom slippers. The telephone bell was stuffed with paper. No one was ad-

mitted to the house, not even the baker.

There was a little room off the kitchen where Helmi and Lili were to sleep. It had just room enough to take in the rubber-wheeled carriage.

"Oh, I will be so glad to have someone to take this old baby off my hands," said Mrs. Herriott frankly; "he spoiled last summer for me, but I don't mean to let him spoil this one. Isn't a baby awful? I hope yours is good. Anyway, I can get out now, and believe me, I am going."

Mrs. Herriott, having shaken off family cares, resumed her place in her little world. She curled and played bridge, and went to the matinee with her friends and came home only when everything was over. She was a pretty, plump-faced girl of twenty-three who had the misfortune to be the only child of adoring parents. "Maudie is not fond of work," her mother often said; "but never mind, she'll take to it when she has a house of her own." Young Robert Herriott, who had married her with pomp and circumstance at the First Church believed the same thing.

Maudie had been in a terrible rage about the coming of the baby, but her mother fondly believed she would be attached to it when it came. "They make their own place, babies do," she said. "Maudie will be so fond of it she wouldn't take a million dollars for it when she has had it two days." But Maudie's friends agreed among themselves that they would hate to offer it to her.

The baby was now two months old, and the great fountain of mother love which the baby's grandmother had hoped for was still either non-existent or untouched. "She'll take to it when it gets a little older," she would say. "You'll see, when it gets cute Maudie will take to it."

Helmi knew that cats sometimes refuse their young, but she did not know that it could be true of human beings.

In a week the seige seemed to be lifted. Long lines of washing had been fluttering on the clothes reel; closets were tidied; floors polished, the "old" baby put on a regular way of living. Mrs. Herriott had won the Ladies' Points competition at the rink, and her friends had told her she was looking years younger.

One night, when the Herriotts were going for a drive, Mr. Herriott wanted to take Helmi, too, and her baby. "That girl hasn't been out of the house since she came," he said, "Ask her to come, Maudie."

Maudie laid a well manicured fin-

DIARRHŒA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhœa and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Exquisitely blended iced fillings, pure and wholesome, sandwiched between two golden crisp biscuit wafers. Just right for dessert any time, anywhere.

ger on a neatly carmined lip. "Hush, Bob," she said, "don't spoil her, leave well enough alone. Come on, we'll take the Bunnings—they have no kids to want to come. Hurry, Bob!" (To Be Continued.)

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH STRAIGHTENING

Your child has "crooked teeth," and wisely, you are thinking of his future, and are not content to let this condition persist.

Irregular teeth are in a sense, a deformity, and often mar one's natural attractiveness, and indeed, in many instances may also lead to general systemic disturbances.

Now, can anything be done by way of correcting this mal-occlusion? A great deal, especially if treatment is commenced while the child is still young.

Each case, of course, presents its own problems with their special solutions, but in the main, your dentist, or the orthodontist who specializes in this branch of dentistry, will correct this condition by making use of metal bands and bars which your child would need to wear continuously for some little time, the period of wearing being determined by the severity of the case in hand.

But you wonder, perhaps, how a tooth can be moved when fully erupted, encased as it is, in dense and seemingly unyielding bone.

However, it is simply a matter of making use of a natural physiological process whereby bone tissue is resorbed and broken down in advance of a properly applied and persistent force, thus permitting the tooth to move bodily through its supporting bony structure.

Then is tooth straightening a painful process?

Not in the least, where too rapid movement is not attempted, and when should it be commenced?

Many operators like to take the case in hand while the child still has the temporary set, and generally at about the eighth year, when success is more easily and quickly secured.

Then, of course, where treatment is delayed, the case becomes progressively more difficult of correction because the muscles and tissues are becoming more or less fixed. When early adult life is reached, "tooth straightening" is not advisable except in the very simple cases.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Use Planes Like Taxicabs

The airplane is becoming the long-distance taxicab of Alaska. Department of the Interior figures show that Alaska makes more use of aerial transportation in proportion to population than any other section. The territory has forty flying fields.

A reliable antiseptic—Minard's.

Alberta Telephones

An increase of 154 exchange stations and 93 rural stations, or a total of 247 new stations in operation during the month of April, 1923, is reported by the Alberta Department of Telephones.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Travelling at the rate of two miles a minute it would take an aeroplane nearly 35 years to reach Mars.

Minard's Liniment for insect bites.

Little Helps For This Week

"He that hath a pure heart shall receive the blessing from the Lord."—Psalm xxiv, 4, 5.

O God! the pure alone, Even in their deep confessing, Can see Thee as their own, And find the perfect blessing; Yet to each waiting soul Speak in Thy still, small voice, Till broken love's made whole, And saddened hearts rejoice.

How does Jesus make men pure? He made Himself one with our human nature that He might heal and bless it through its contact with His divinity. He folded it around His eternal presence. He made it His own. He made it a power which could quicken and restore us; and then by the gift of His Spirit He bound us to it. He robed us in it; and henceforth Christian humanity became conscious of a Presence before which the unclean spirit cannot but shrink away. —Cannon Liddon.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

Two French engineers have invented an aerial torpedo for transporting letters and packages at a speed of nearly 300 miles an hour.

Human nature's funny. No sooner does a man "get on his feet" financially than he wants to get off them physically.

Cute in a Baby—Awful at Three—and it's Dangerous—by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Plugging the sleeve over the hand; attacking mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhœa, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

Strengthened For Extra Long Mileage

Gum-Dipping, the exclusive Firestone process, impregnates and insulates every fibre of every cord with rubber, building into Firestone tires longer service by strengthening the side walls to withstand the extra flexing strain.
